I am not sure if this represents the deposition eve production that Adam, Rich and I learned about yesterday during his deposition, as we received reports of a production of between 500 and 800 pages. I will confirm whether they are the same. Meanwhile, it is ammunition to get him back and I'm sure Rich and Adam would agree that, given his demeanor and lack of preparation, we really want him back. I need to shred him on the due diligence for the acquisition. Please let me know what further help I can give to you to get him again.

Thanks.
